Leadership Climate impact

About this report

The **Leadership Climate Indicator** is being used as a measure of the tone set by the senior leaders in your organisation. This has been introduced to enable the leaders of your organisation to build trust in the business and cultivate a leadership climate that will create a sustainable culture for performance.

The questionnaire measured the extent to which leaders exhibit **green** leadership behaviours, i.e. those that create a climate which engenders trust in leaders and in which people feel inspired to perform to their potential, and **red** leadership behaviours which erode trust and engagement if used habitually.

How to use this report

These results represent the views of respondents in terms of the leadership climate you may create.

Responses are rated against a **1** to **5** scale:

- 1 – strongly disagree
- 2 – disagree
- 3 – neither agree nor disagree
- 4 – agree
- 5 – strongly agree

The front page of this report shows the leadership group being rated and who are the survey respondents. The results have also been compared with the leadership ratings of a comparison group (shown on the front cover).

The emotional climate of an organisation starts at the top.
The role of leaders is to mobilise, focus, inspire and regularly renew the energy of those they lead.

Leadership Climate overview

The diagram below displays the average rating by survey respondents on each of the twelve Leadership Climate Indicator scales (as shown by the **green** and **red** bars). The **blue** line shows the average score for the leadership comparison group. The twelve scales are grouped into four clusters or quadrants described below:

Controlling

Indicates the extent to which senior leaders are seen to demonstrate negative behaviours and attitudes (shown in red) in terms of how **Competitive, Aggressive** and **Demanding** they are. Controlling behaviours can be effective and appropriate for mobilising people's energy in a short term crisis, but if used habitually they erode trust and instil fear and defensiveness in others. Over time, a controlling style can impede collaboration, innovation and can be toxic leading to burnout and disengagement.

Withdrawing

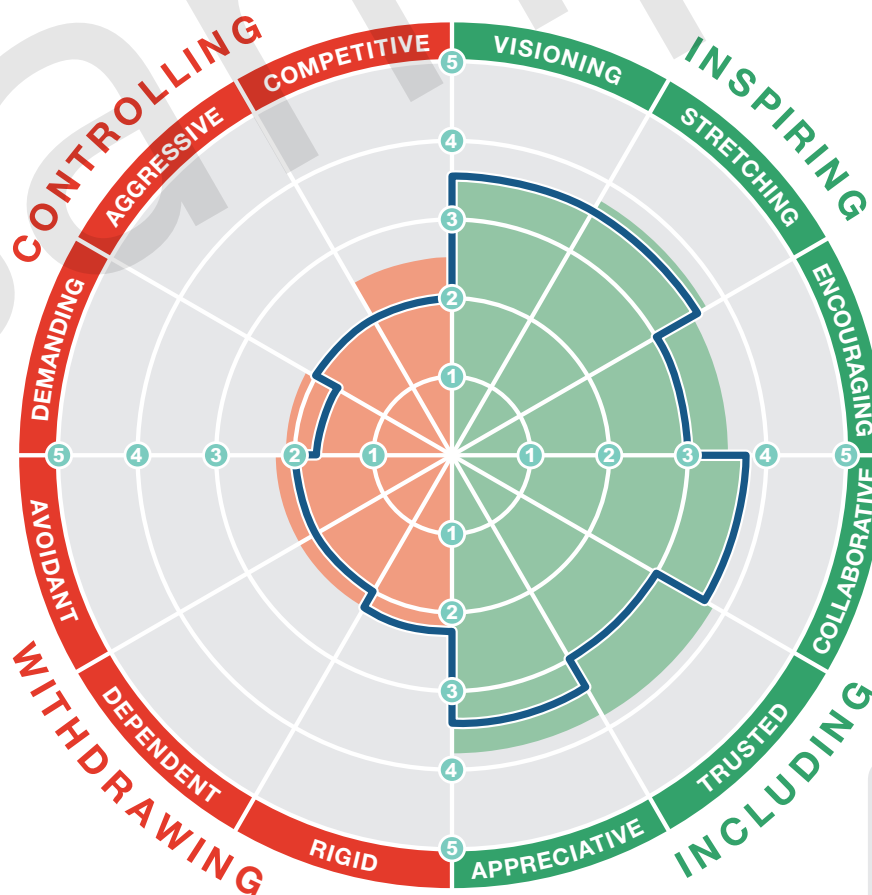

Indicates the extent to which senior leaders are seen to demonstrate negative behaviours and attitudes (shown in red) in terms of how **Avoidant, Dependent** and **Rigid** they are seen to be. When leaders are operating in this quadrant they tend to detach themselves from people and issues. Energy is low and innovation, healthy conflict and connection are the victims of leaders who retreat into their comfort zones.

Inspiring

Indicates the extent to which senior leaders are seen to demonstrate positive behaviours and attitudes (shown in green) in terms of how **Visioning, Stretching** and **Encouraging** they are. When leaders act in this way they generate a positive climate where people feel inspired, motivated and challenged to move out of their comfort zones and perform at their best.

Including

Indicates the extent to which senior leaders are seen to demonstrate positive behaviours and attitudes (shown in green) in terms of how **Collaborative, Trusted** and **Appreciative** they are. By acting in this way, leaders generate trust, loyalty and commitment and build emotional capital which can be drawn on to sustain performance and maintain resilience in the face of pressure.

- 1 – Strongly disagree
- 2 – Disagree
- 3 – Neither
- 4 – Agree
- 5 – Strongly agree

Leadership Climate item analysis

The tables below show the percentage of responses that are **negative**, **neutral** and **positive** on each question of the Leadership Climate Indicator.

The colour of each question indicates whether your leadership group scored higher, lower or the same as the comparison group.

Red Your leadership group scored within the **lowest third** of the comparison group

Amber Your leadership group scored within the **middle third** of the comparison group

Green Your leadership group scored within the **highest third** of the comparison group

Inspiring

Visioning

	Percentage of respondents		
	Disagree	Neutral	Agree
1. Articulate a clear and compelling vision	20	5	75
2. Engender a feeling of optimism and a positive view of the future	12	15	73
3. Provide people with a sense of meaning and purpose to their work	10	24	66
4. Energise and motivate people to strive for the vision	20	20	60

Stretching

1. Set challenging but realistic goals	10	22	68
2. Inspire others to strive for optimal performance	15	24	61
3. Promote continuous improvement and innovation	7	15	78
4. Empower people and hold them accountable for performance	22	17	61

Encouraging

1. Build confidence in those they lead	20	27	53
2. Provide on-going formal and informal constructive feedback	34	27	39
3. Invest time and resources in developing people	31	32	37
4. Encourage and reward good performance	15	26	59

38

The table shows the percentage of responses that are **negative**, **neutral** and **positive** on each question.

The colour of each question indicates whether your leadership group scored higher, lower or the same as the comparison group. For these scales a low score is positive (**green**) and a high score is negative (**red**).

Green Your leadership group scored within the **lowest third** of the comparison group

Amber Your leadership group scored within the **middle third** of the comparison group

Red Your leadership group scored within the **highest third** of the comparison group

Please note that the red and green columns are reversed from pages 4 and 5.

Withdrawing

	Percentage of respondents		
	Disagree	Neutral	Agree
Avoidant			
1. Are often unavailable or inaccessible	51	20	29
2. Avoid discussion and debate	71	17	12
3. Seem to lack awareness of or understanding of others	51	22	27
4. Are often unresponsive and ignore people	59	29	12
Dependent			
1. Seek approval or defer decisions to others	90	10	0
2. Are passive and avoid conflict	78	15	7
3. Procrastinate and are slow to take action	71	14	15
4. Seem unsure of themselves and lack genuine conviction	90	7	3
Rigid			
1. Rigidly stay within their comfort zone	66	24	10
2. Are resistant to new ways of doing things	76	10	14
3. Can be dogmatic and are hard to influence	46	34	20
4. Are somewhat intolerant and perfectionistic	42	34	24
Withdrawing overall average	66	20	14

The table shows the percentage of responses that are **negative**, **neutral** and **positive** on each question.

The colour of each question indicates whether your leadership group scored higher, lower or the same as the comparison group. For these scales a low score is positive (**green**) and a high score is negative (**red**).

Green Your leadership group scored within the **lowest third** of the comparison group

Amber Your leadership group scored within the **middle third** of the comparison group

Red Your leadership group scored within the **highest third** of the comparison group

Please note that the red and green columns are reversed from pages 4 and 5.

Leadership Climate impact

The following set of questions are completed by the survey respondents, these are key indicators as to the impact of the Leadership Climate on respondents' **Performance**, **Engagement**, and **Well-being**.

There are three levels of impact as shown by this diagram. This is based on the model of the JCA Emotional Intelligence framework, the premise being that **Well-being (Attitude)** drives **Engagement (Feeling)** which leads to **Performance (Behaviour)**. The more **green** or positive the leadership and organisational climate, the greater the energy, commitment and resilience of the leaders and their followers.

The table shows the percentage of responses that are **negative**, **neutral** and **positive** on each question.

The colour of each question indicates whether the leadership group scored higher, lower or the same as the comparison group.

- Red** Your leadership group scored within the **lowest third** of the comparison group
- Amber** Your leadership group scored within the **middle third** of the comparison group
- Green** Your leadership group scored within the **highest third** of the comparison group

Performance	Percentage of respondents		
	Disagree	Neutral	Agree
1. The working environment helps me focus my attention and perform at my best	24	20	56
2. I feel able to be innovative, take risks or try new ideas	10	10	80
Engagement			
1. I am satisfied and fully engaged at work	7	20	73
2. I feel appreciated and supported at work	7	30	63
Well-being			
1. I have a clear sense of purpose and meaning to my work	2	0	98
2. I feel physically and emotionally full of energy	24	20	56
Overall impact	20	17	63
